

villa-bonaire

Finally holiday!

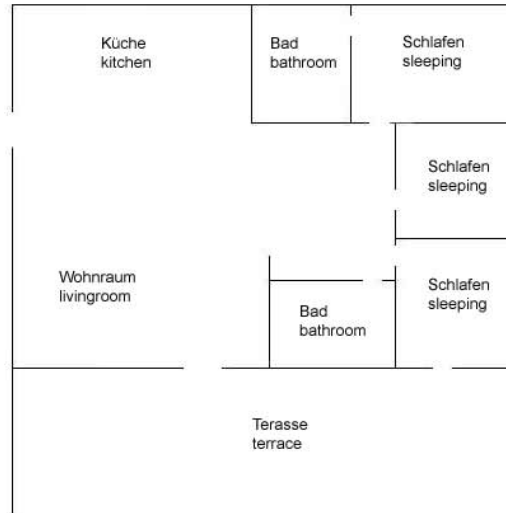

Living here
and then -
diving Bonaire

individual shore-diving,
no stress with any schedule,
quite how, where
and when you want

**And in order to enhance the
individuality, live in a
privately rented house!**

The house is designed
for divers.

Holds up to 6 people,
living space
140 m² + 60 m² terrace.
And a dreamlike sea view

The island is surrounded by a fringing reef, which in 1979 the Marine Park was declared. More than 80 dive sites invite the divers.

The water temperature is between 27 ° C and 29 ° C. The visibility is

superb average of 30 meters.

But even one or two trips ashore you should indulge. There is next to wildly romantic landscape also some creatures to discover.

If a trip to the Washington National is planned, the diving equipment should not leave at home, because even here, there are some dive sites to explore.

Approx. 100 km off the coast of Venezuela are the so-called ABC islands (Netherlands Antilles).

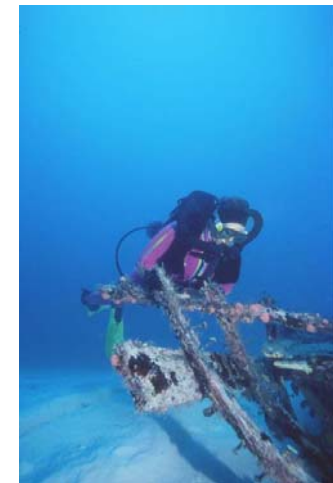

The easternmost of them is our object of desire.
